

PACLOCK™

“200” SFIC SERIES

PACLOCK’s “200A-IC”, “200-IC” & “250-IC” Series padlocks offer superior security with three body styles to choose from. Our “200A-IC”, “200-IC” & “250-IC” series padlock are precision CNC’d for quality and dependability and work with your 5, 6, and 7 pin SFIC interchangeable cores.

Our “200-IC” Series is manufactured from steel that is hardened and then nickel-plated for extreme toughness and resistance to the elements. Every “200A-IC” is machined from 6061 Aircraft Grade Aluminum, and then anodized with one of ten available colors. The “250-IC” Series padlock is a solid brass body padlock that is nickel-plated to withstand the harshest elements. It is also ideal for heavily corrosive environments!

The “200A-IC”, “200-IC” & “250-IC” come ready to install any SFIC cylinder! Each lock features a non-key retaining brass actuator and dual locking stainless steel ball bearings. With our design, PACLOCK significantly reduces

the ability for the lock to be shimmed and pulled! PACLOCK provides key retaining options ensuring your padlock gets locked!

The “200A-IC”, “200-IC” & “250-IC” Series come standard with a 1-3/16” hardened steel shackle. With PACLOCK’s quick change shackles, you can easily adapt your padlock to any application with just a turn of a wrench. Change the shackle height or type to meet your needs. Take advantage of PACLOCK’s multiple shackle options!

With “Your Logo, Your Locks”™ program, take advantage of engraving on either your aluminum or brass locks! This is a great way to maintain brand continuity or to provide contact information for lockout zones!

If you have any questions or concerns about our products give us a call at 661.294.3707 or visit us on the web at www.paclock.com.

PRODUCT NUMBER	BODY TYPE	DESCRIPTION/SPECIFICATION	SHACKLE DIMENSIONS		
			(A)	(B)	(C)
200A-IC	ALUM.	2” WIDE 6061 ALUMINUM PADLOCK	3/8”	1-3/16”	25/32”
