

# PACLOCK

## “90” SFIC SERIES

PACLOCK’s “90A-IC” & “95-IC” SFIC Series padlocks offer superior security with two body styles to choose from and are precision CNC’d for quality and dependability and work with your 5, 6, and 7 pin SFIC interchangeable cores.

Every “90A-IC” is machined from 6061 Aircraft Grade Aluminum, and then anodized with one of ten available colors. Our “90A-IC” is resistant to corrosive environments and ideal for marine applications. The “95-IC” Series padlock is a solid brass body padlock that is designed specifically for the harshest elements. It is also ideal for heavily corrosive environments!

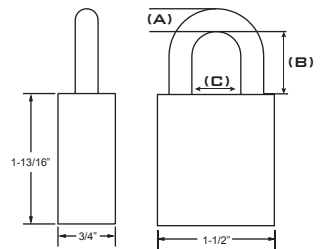

The “90A-IC” & “95-IC” come ready to install any SFIC cylinder! Each lock features a non-key retaining brass actuator and dual locking stainless steel ball bearings. With our design, PACLOCK significantly reduces the ability for the lock to be shimmed and pulled! PACLOCK provides a key retaining option to ensure your padlock gets locked!

The “90A-IC” & “95-IC” Series come standard with a 1-3/16” hardened steel shackle. With PACLOCK’s quick change shackles, you can easily adapt your padlock to any application with just a turn of a wrench. Change the shackle height or type to meet your needs. Take advantage of PACLOCK’s multiple shackle options!

With “Your Logo, Your Locks”™ program, take advantage of engraving on either your aluminum or brass locks! This is a great way to maintain brand continuity or to provide contact information for lockout zones!
