

PACLOCK™

*CYLINDER NOT INCLUDED

SFIC COMPATIBLE HOCKEY-PUCK SERIES

These hockey-pucks are precision CNC'd for quality and dependability. With our hidden shackle design your lock is protected from direct access by boltcutters and hacksaws. If ultra high security is the goal, then our hardened steel bodies are the right choice! PACLOCK's aluminum hockey-pucks provide high security in a weather resistant package and at a more attractive price point!

With only one moving part, PACLOCK's puck lock lacks the environmental vulnerabilities that traditional, shackled padlocks have. Even after years of exposure to the elements, this lock will still function!

Take advantage of "Your Logo, Your Locks"™ program and custom engrave your lock with your logo or information.

If you're looking for the ultimate security, pair your hockey puck with one of our shrouded hasps! With 1/4" thick steel, you can rest easy knowing that your hockey puck and hasp are keeping the bad guys out!

Don't limit what you can protect! PACLOCK provides multiple keying options so that you can give direct access to people you can trust. With multiple keying options available, lockup or lockout heavy equipment, zones, and access points.

Take advantage of "Your Logo, Your Locks"™ program and custom engrave your lock with your logo or information.

"400-IC2" Series

This series has a "stepped back" cut-out for fitment to bar-style hasps.

"2170-IC2" & "2170A-IC2" Series

This series has a flatback for using with shrouded hasps including PACLOCK's PL770 & PL775 hasps.

"2171-IC2" & "2171A-IC2" Series

This Series has a flatback for shrouded hasps in addition to two tapped holes on the back specifically designed to use with our PL770 or PL775 shrouded "Super Hasps." This allows the hockey-puck to stay connected to the hasp when opened for added convenience.

"2172-IC2" & "2172A-IC2" Series

This Series is specially designed to attach to the American Lock brand of the "801" hasp.

Custom Built Solutions

PACLOCK works with its customers to develop and manufacture custom hockey-pucks. We can make the puck taller, with a deeper slot, a more narrow slot, tapped holes in the back, or virtually anything else you can think of doing to a 2-7/8" round piece of bar stock! Just give us a call.

If you have any questions or concerns about our products give us a call at

"2171-IC" Series
Hardened Steel Body

"2170A-IC" Series
Aluminum Body
