

PACLOCK™

*CYLINDER NOT INCLUDED

BRASS "KIK" SERIES

PACLOCK's "Kik" Series padlocks are compatible with all Key-in-Knob cylinders for your convenience. Our Brass "Kik" Series padlocks are precision CNC'd for quality and dependability with a solid brass body which is then nickel plated to withstand the harshest elements Mother Nature has to offer. It is also ideal for heavily corrosive environments! Check out PACLOCK's Aluminum "Kik" Series which is available with an aluminum body and comes in ten anodized colors of your choosing.

What makes our "Kik" Series stand apart from the competition is the tremendous variety of shackle options available! In one body size we offer all three shackle diameters. From the low security 1/4" diameter shackle to the moderate security 5/16" diameter to the high security 3/8" diameter shackle, the "Kiks" can support them all! Choose the "Kik-1B" for 1/4", the "Kik-2B" for the 5/16", and the "Kik-3B" for the 3/8" diameter shackles. No other manufacturer can match this PACLOCK capability!

The Brass "Kik" Series padlock ships with all of the parts necessary to install your Key-in-Knob or Key-in-Lever cylinder. Select either one of three available drivers depending on the type of cylinder you intend to install. The lock ships standard with a non-key retaining brass actuator and dual stainless steel locking ball bearings. With our unique design, PACLOCK significantly reduces the ability for the lock to be shimmed and pulled!

The Brass "Kik" Series comes standard with a 1-3/16" hardened steel shackle. With PACLOCK's quick change shackles, you can easily adapt your padlock to any application with just a small shackle wrench. Change the shackle height or type to meet your needs. Take advantage of PACLOCK's multiple shackle options!

With theft on the rise, having the right security solution is a must! If you have any questions or concerns about our products give us a call at 661.294.3707 or visit us on the web at www.paclock.com.
