

PACLOCK™

CYLINDER NOT INCLUDED, SHOWN WITH CLEAR BRASS FINISH (NICKEL-PLATED AVAILABLE)

“LFIC” YALE Y6 & MEDECO M31 SERIES (6-PIN)

PACLOCK’s “LFIC” Series padlocks offer superior security with aluminum and solid brass bodies that are precision CNC’d for quality and dependability and works with your 6 pin large format Yale® and Medeco® compatible cores.

The LFIC Series offers one padlock body size but with three available shackle diameters: 1/4”, 5/16”, and 3/8”. If your application demands high security and a thick shackle, then the LFIC-Y6-3B’s 3/8” diameter shackle is the correct choice. If your application requires a smaller diameter shackle, then the 1/4” diameter shackle of the LFIC-Y6-1B is the right call.

Whether it’s the brass or aluminum, a variety of shackle heights are available as well. From the short, 3/4” length to the long 3” length, PACLOCK has you covered.

With its brass or aluminum body the LFIC will withstand the harshest of environments. Each lock features a non-key retaining brass actuator and dual stainless steel locking ball bearings. With our design, the LFIC Series significantly reduces the ability for the lock to be shimmed, pried and pulled! For added security, the LFIC Series can be converted to key retaining to ensure your padlock gets locked.

When other manufacturers are cutting out product availability for your LFIC systems, you can count on PACLOCK to continue expanding its product line to serve you better.

If you have any questions or concerns about our products give us a call at 661.294.3707 or visit us on the web at www.paclock.com.

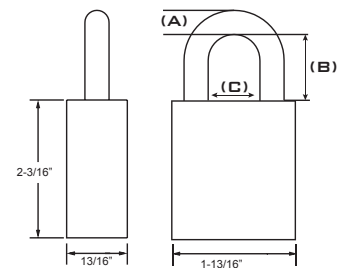

PRODUCT NUMBER	BODY TYPE	DESCRIPTION/SPECIFICATION	SHACKLE DIMENSIONS
